

Rocket Engine Throttle Valve Control Software

- Developed C++ firmware for controlling throttle valves on a liquid fueled rocket engine for Purdue Space Program
- Integrated control system with 7 Pressure Transducers and 2 Thermocouples using shared SPI bus
- Communicated with 2 throttle control motors over CAN bus
- Verified code functionality through MATLAB Simulink simulations and hardware in the loop testing
- Explained code design decisions during Test Readiness Review presentations

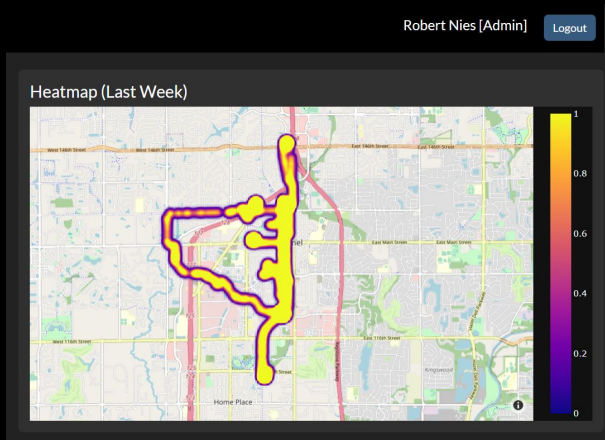

FIRST Robotics Competition Robot

- Lead 70 person team to design, fabricate, and assemble a competition robot in 6 weeks for FRC Team 868
- Tracked project timelines and assembly dependencies to ensure competition readiness
- Coordinated with Programming/Electrical lead on interdependent design decisions
- Won 2 district qualifying competitions
- Competed at the World Championship, won Excellence in Engineering Award

Electric Bike Tracking and Telemetry System

- Developed E-Bike GPS tracking and telemetry system to protect customers against theft
- Configured PostgreSQL database and Web UI in Google Cloud
- Setup authentication with Google OAuth so customers could securely access location data
- Worked directly with customers to refine user experience and features
- Designed custom PCB to integrate GPS tracker with E-Bike battery

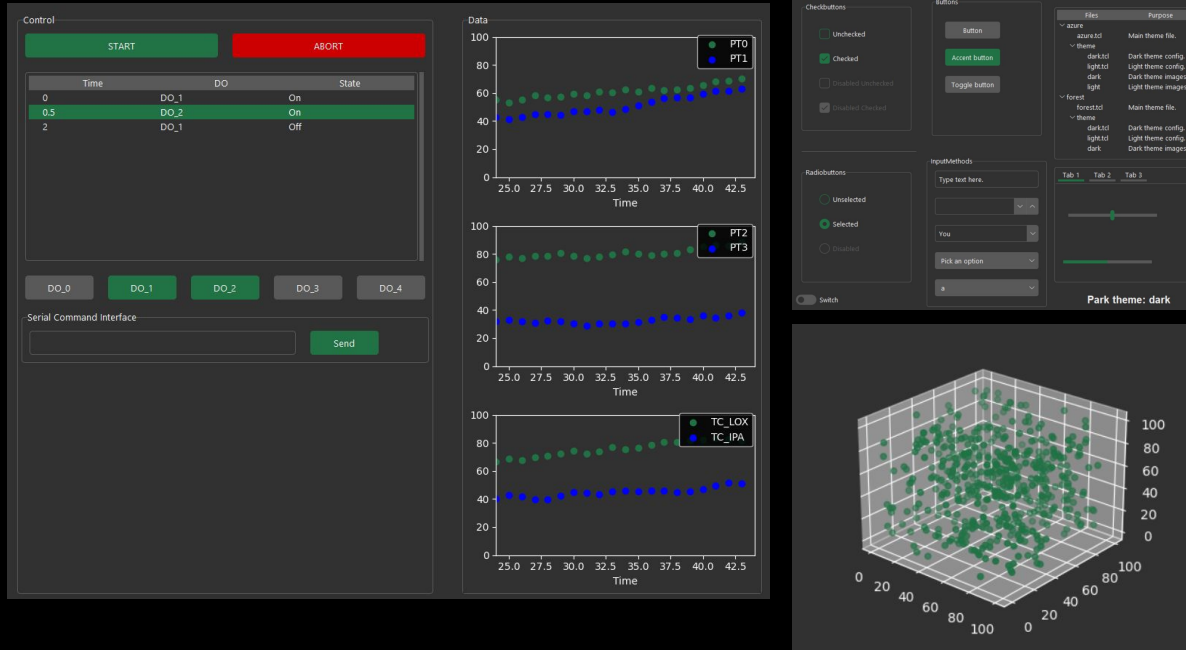

Autonomous Boat with Depth Finder

- Designed, built, and programmed autonomous boat for mapping lake depths
- Parsed NMEA messages from GPS for positioning, and combined with IMU data for navigation
- Created web interface to view real-time depth measurements from sonar transducer
- Developed software for direct remote control and fully autonomous path following

Python UI Library for Rapid Data Visualization

- Developed Open Source python library for creating data visualization and control system dashboards
- Implemented across personal and freelance projects to reduce development time
- Supports Matplotlib for 2D and 3D graphs
- github.com/RobertJN64/TKinterModernThemes (150 stars / 500 weekly downloads)
